

Flannel Flower

Nutrients

**Chlorogenic Acid
- Phenolic Acid**

**Lignan
- Polyphenol**

Amino Acids

Amines

Flavone Glycosides

Phenolic Acids

**Triterpene
derivatives**

Nutrient Features

Anti-acne activity.

Significant anti-oxidant activity.

Provides substantial protection from UV radiation.

Anti-Glycation* activity.

Inhibition of melanogenesis - reduces coloured pigmentation allowing even skin colour.

Conditioning agent.

Anti-inflammatory activity.

Anti-acne activity.

Reduces membrane liquid peroxidation and DNA damage.

Hair protectant and natural hair conditioner.

Moisturiser.

Neo-collagenesis activity.

Strengthens capillaries.

Alleviates aging induced oxidative stress.

Rehydration and plumping of skin.

Benefits

Reduces skin redness and irritation and clears pore blockages.

Protection from damaging free radicals.

Helps skin hydration.

Aids cutaneous metabolism to prevent skin alteration (sun spots/age spots/skin blemishes) and early aging.

Reverses the appearance of dimples and cellulite.

Reduces visibility of sun spots.

Skin whitening.

Potent skin and hair conditioning active.

Dark circle and puffiness reduction under the eye.

Potent anti-aging active.

Reduces potential of early aging and onset of fine lines and wrinkles.

Protects hair from UV damage.

Anti-static agent providing conditioning benefits for the hair.

Adds feel of smoothness to the skin and hair.

Builds protein hydrolysate moisture in the skin and hair.

Stimulates the growth of collagen reducing fine lines and wrinkles.

Reduces the appearance of fine lines and wrinkles.

Makes skin glow, lumosity.

Effective active for specific dermatologic conditions.

* Glycation is when sugar molecules are present, they grasp onto fats and proteins in a process know as glycation, forming advanced glycation end products, which cause protein fibres, or collagen, to become stiff and malformed.
