- Phenolic Acid

Isovitexin
- Flavone Glycoside

Polygodial
- Sesquiterpene

Flavone Glycosides

Nutrient Features

Active against hair loss.

Anti-acne activity.

Significant anti-oxidant activity.

Provides substantial protection from UV radiation.

Anti-Glycation* activity.

Anti-inflammatory activity.

Anti-allergic properties.

Reduces membrane liquid peroxidation and DNA damage.

Neo-collagenesis activity.

Strengthens capillaries.

Benefits

Reduction of fine lines and wrinkles.

Increased skin elasticity. Reduces the potential of stretch marks (pregnancy).

Anti-aging.

Reduces visibility of sun spots.

Dark circle and puffiness reduction under the eye.

Skin whitening.

Helps skin hydration.

Aids cutaneous metabolism to prevent skin alterations (sun spots/age spots/skin blemishes) and early aging.

Protection from damaging free radicals.

Reduces skin redness and irritation and clears pore blockages.

Helps skin recover from over exposure to sun.

Helps in the growth and protection of hair.

Reverses the appearance of dimples and cellulite.

Protection against environmental pollution allergies.

Reduces potential of early aging and onset of fine lines and wrinkles.

Stimulates the growth of collagen reducing fine lines and wrinkles.

* Glycation is when sugar molecules are present, they grasp onto fats and proteins in a process known as glycation, forming advanced glycation end products, which cause protein fibres, or collagen, to become stiff and malformed.
