

Snowflower

Nutrients

**Gallic Acid
- Phenolic Acid**

**Quercetin
- Flavonol**

**Catechin
- Flavan-3-ol**

**Kaempferol
- Flavone Glycoside**

Nutrient Features

- Reduces membrane liquid peroxidation and DNA damage.
- Inhibition of melanogenesis - reduces coloured pigmentation allowing even skin colour.
- Improves a variety of inflammatory skin disorders.
- Potent anti-oxidant.
- Helps in the protection of skin from Dermatitis and photo-sensitivity.
- Lowers inflammation.
- Protects against oxidative stress induced cell death.
- Protects against heat shocked skin damage.
- Rehydration and plumping of skin.
- Protection of hair follicle from sun and pollution damage.
- Provides substantial protection from UV radiation.
- Depigmentation activity.
- Anti-inflammatory.
- Inhibits skin photo-aging (sun damage).
- Intensifies the activity of vitamin C and is synergistic with vitamin C.

Benefits

- Potent anti-aging active.
- Reduces potential of early aging and onset of fine lines and wrinkles.
- Reduces visibility of sun spots.
- Dark circle reduction under the eye.
- Skin whitening.
- Reduces skin redness and irritation.
- Helps skin recover from over exposure to sun.
- Protection from damaging free radicals.
- Creates a barrier protecting the skin from environmental damage and pollution.
- Anti-aging and thermal skin aging active.
- Reduces appearance of fine lines and wrinkles.
- Makes skin glow, lumosity.
- Maintains health of hair and protects the hair follicle from external damage.
- More effective as an anti-oxidant than vitamin C and E together (Catechin-Flavan-3-ol).
- Helps skin hydration.
- Aids cutaneous metabolism to prevent skin alterations (sun spots/age spots/skin blemishes) and early aging.
- Able to maintain health of skin in the presence of damaging environmental factors such as UV radiation.
- Increased skin elasticity. Reduces the potential of stretch marks.
