Nutrients

Anthocyanin - Flavonoid

Tryptophan
- Alpha Amino Acid

Chlorogenic Acid
- Phenolic Acid

Adenosine - Nucleotide

Caffeoyl Quinic Acid
- Phenolic Acid

Terpenoids

Deoxy-Glucitol
- Sugar Alcohol

Amino Acids

Amines

Alkaloids

Phenolic Acids

Nutrient Features

Reduces membrane liquid peroxidation and DNA damage.

Improves mitochondrial functionality. Promotes regenerative capacity of skin cells. Improves collagen production.

Provides substantial protection from UV radiation.

Protects fibroblasts (new skin cells) from environmental damage.

Hair protectant and natural hair conditioner.

Photo-protection. Helps hair combat damaging UV light from sun.

Anti-acne activity.

Significant anti-oxidant activity.

Anti-Glycation* activity.

Tyrosinase activity.

Potent free radical scaverging activity.

Anti-inflammatory activity.

Promotes the growth of healthy, strong hair.

Inhibition of melanogenesis - reduces coloured pigmentation allowing even skin colour.

Inhibitory effect against pro-inflammatory mediator induced skin problems.

Effective in treating specific dermatological conditions.

Alleviates aging induced oxidative stress.

Endothemic activity.

Humectant.

Repairs hair.

Rehydration and plumping of skin.

Benefits

Potent anti-aging active.

Reduces potential of early aging and onset of fine lines and wrinkles.

Helps restore damaged skin from over-exposure to sun and pollution.

Helps repair connective tissue damage (stretch marks).

Helps skin hydration.

Aids cutaneous metabolism to prevent skin alterations (sun spots/age spots/skin blemishes) and early aging.

Makes skin glow, lumosity.

Helps the protection of skin from damaging environmental factors.

Protects hair from UV damage.

Anti-static agent providing conditioning benefits for the hair.

Adds feel of smoothness to the skin and hair.

Reverses the UV damage in hair follicles.

Reduces skin redness and irritation and clears pore blockages.

Protection from damaging free radicals.

Reverses appearance of dimples and cellulite.

Potent skin whitening activity.

Gives hair shine and lustre.

Dark circle reduction under the eye.

Reduces visibility of sun spots.

Effective results against Dermititis, Psorisas and Eczema.

Reduces the appearance of fine lines and wrinkles.

Creates cooling sensation on the skin (after sun products).

Builds protein hydrolysate moisture in the skin and hair.

^{*} Glycation is when sugar molecules are present, they grasp onto fats and proteins in a process know as glycation, forming advanced glycation end products, which cause protein fibres, or collagen, to become stiff and malformed.
